

What We Do

We do maintenance and repairs on all refrigeration and air conditioning systems in the following markets: Abattoirs, Butcheries, Poultry, Milk, Cheese, Chicken Storage, Hatchling Transport, Vegetable Storage, Fruit Storage and transport refrigeration.

It includes the following equipment:

Cold rooms, freezer rooms, air conditioners (Domestic, offices, commercial and central air conditioners), Transport and mobile refrigeration, Insulated trailers, Electrical Repairs, Solar Heating, Solar Cooling, Ice Machines.

We also repair butchery and restaurant equipment.

The additional service we render is:

Temperature monitoring on cold rooms, freezer rooms, server rooms and other critical equipment.

Performance profiling

We validate the condition of equipment.

We predict failure and breakdowns before it happens.

We do root cause analysis of failures and breakdowns.

We do independent, third party, workmanship validation on repairs and new installations.

We position our clients to schedule and repair potential breakdowns before they happen.

Challenge us and see how we can save your organisation money.
